SUMMARY

• As a fresh frontend developer with a strong foundation in HTML5, CSS3, React.JS, JavaScript and TypeScript.
• Using Bootstrap for responsive design. Knowledge in Node.JS, Express.JS and MongoDB.
• Skilled in crafting dynamic and visually appealing web interfaces, building efficient and scalable.

MY PORTFOLIO

https://harshithkv-my-portfolio.vercel.app/

PROJECTS

Developed Responsive Gym Website
08/2023 - 08/2023
https://responsive-gym-website-xi.vercel.app/
Created a fully responsive gym website using React.js and CSS3.
- Designed and implemented a visually appealing showcase for gym plans, reviews, gym gallery and trainers on the website.
- Ensured an optimal user experience across various devices and screen sizes, enhancing accessibility.

Employee Data Table
11/2023 - 11/2019
Designed and developed an employees' data table application using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Implemented Bootstrap and CSS for visually appealing and responsive styling of the application components.
- Created a secure login page to authenticate users, providing access to personalized dashboards.
- Implemented a dynamic employee data table within the user dashboard for efficient data management.
- Enabled users to create, search, edit, and delete employee records, enhancing the application's functionality.

Responsive Admin Dashboard
09/2023 - 09/2016
https://react-admin-dashboardprojects.netlify.app/
Developed a dynamic React admin dashboard using React, JavaScript, and Tailwind CSS to create a modern and user-friendly interface.
- Designed and integrated features to showcase essential business metrics, including revenue, total sales and cost, and transaction history.
- Ensured the dashboard's responsiveness, providing a consistent experience across various devices and screen sizes.
